**Swissotel Le Concorde**  
**Bangkok, Thailand**  
18 March 2008

Zero Energy Building @ BCA Academy, Singapore (DP Architects Pte Ltd)

The Campuan, Indonesia (Edy Semara Architect International)

Bukit Ledang Gardens, Malaysia (Ecological-Homes (M) Sdn Bhd)

## THAILAND FUTURARC FORUM

Tuesday, 18 March 2008

Organized by:

**BCI** ASIA™

Hosted by:

FUTURARC

Thailand FuturArc Forum

Platinum Sponsor:

**ALPOLIC®/fr**  
INNOVATION • STYLE • PERFORMANCE  
▲ Mitsubishi Chemical Functional Products, Inc.

Gold Sponsors:

**GROHE**  
ENJOY WATER

BCI Asia Top 10 Awards Patrons:

**Autodesk**

**CISCO**™

## Green Building

*“The facts are well-known, largely undisputed, and devastating: we are systematically destroying our home, the planet we live on. Buildings are a major cause of green-house gas emissions, wastage and pollution, yet today we know that holistic sustainable design can minimize a building’s impact on the environment.”*

### Dr Matthias Krups

Chairman of the BCI Group, Publisher of *FuturArc*

FuturArc Forum 2008 will enable 4,000 architects, developers, engineers and students of these professions to learn more about green building and sustainable design first-hand from leading architects, engineers and academics. The nine conferences, each designed as an exceptional day of learning and information exchange, will be held in Jakarta, Singapore, Manila, Kuala Lumpur, Bangkok, Ho Chi Minh City, Sydney, Hong Kong and Shanghai between February and April 2008. Besides speeches by pioneers in green building, each conference will feature a presentation of awards for the FuturArc Prize 2008 competition and the release of a nine-country survey on green building.

**Dr Soontorn Boonyatikarn** is a Professor of Architecture and Director of Center of Excellence: Building and Environmental Technology, Faculty of Architecture, Chulalongkorn University. He is a leading expert in sustainable design, ecology design approach, energy conservation and energy production. He won many international awards for his research such as the Gold Medal with Mention Award for “The Innovation of Future Home” from “BRUSSELS EUREKA 2000: 49th World Exhibition of Innovation, Research, and New Technology” in Belgium.

**Vimolsiddhi Horayangkura** is the Dean of Faculty of Architecture and Planning, Thammasat University. As a Professor of Architecture, Vimolsiddhi served as an instructor and researcher earlier at Chulalongkorn University before initiating a “4 + 2” Architecture programme at Thammasat University in 1999. His main concerns for the past decade have been on environmental design education, advocating sustainability innovation through the integration of various disciplines. He actively promotes research to establish knowledge-based design, planning and management of the built environment. As Board Member of the Architect Council, Thailand, he urges coordinating education and professional practice towards attaining more sustainable approaches.

**Oh Lock Soon**, Chief Operating Officer, T.C.C. Capital Land Limited, Thailand, is a registered Professional civil engineer in Singapore. Mr Oh has more than 20 years of experience in research, planning, formulation, implementation and management of numerous public housing policies and projects. He specialises in the research and application of prefabrication technology for building systems. In 2005, under his supervision and management, a unique tropical green roof system was developed, patented and implemented in Singapore. The technology aims to reduce urban heat island effect and to achieve a greener environment in the highly built-up city state of Singapore.

**Yupa Chongpatiyutt** As Director of Interior Design and Partner, Yupa is responsible for the financial success of Woods Bagot Thailand. With over 18 years experience in Interior Design fitout, strategic facility planning and Project Management, Yupa leads the successful delivery of projects across Asia and the Middle East. With specialist skills in corporate office design, banking and finance, hospitality, and residential projects, Yupa ensures clients receive innovative design solutions and responsive service every time.
