

Order form

This year, **architecture@12** features projects located in modern cities in various parts of Asia—China; Hong Kong; India; Indonesia; Malaysia; Philippines; Singapore; Thailand and Vietnam. Set to start construction in 2012, they will help define the modern city in Asia in the near future.

Each profile includes project description, images and summary information. These projects are selected each year from more than 100,000 future projects reported by BCI Asia and BCI Australia researchers. In compiling information on these projects, BCI researchers interview half a million architects, developers, engineers and contractors.

Besides projects, **architecture@12** also reviews building technologies in a dedicated section called technologies@12 that enable architecture to evolve rapidly, providing a reference guide of innovative and intelligent solutions for architects, engineers and developers. Each review is presented in an easy-to-read format describing the products and/or services of a single leading manufacturer in each field.

I would like to place an order for **architecture@12** for VND600,000 (including VAT) per copy including postage and handling.

Get 15% off when you sign up before 31 December 2011.
